## **MISSION**

To develop construction and mining operations with safety, quality and efficiency to meet our clients' needs, ensuring the safety and well-being of our employees who are our main asset, protecting the environment and leading our efforts towards a sustainable development.

## **VISION**

Be the best mining and infrastructure contractor company in the national and international mining sector. In medium term, we want to expand our business in other sectors, and markets.

## **OUR VALUES**

Safety  
Leadership  
Communication  
Teamwork  
Appreciation  
Integrity  
Responsibility

We are a specialized company in the implementation of construction sites and underground mining operations with emphasis in the exploration, development, preparation and extractions of minerals, as well as supplementary contract services.

We operate in Peruvian territory with international certifications ISO 14001 (Environmental Management System), ISO 45001 (Occupational Health and Safety System) and ISO 9001 (Quality Management System) which guarantee the compliance of our operations with national and international standards.

Our policies of safety, occupational health and environment are the basis of our integrated management system. Additionally, we count with the equipment and technological support to fulfill our objectives.

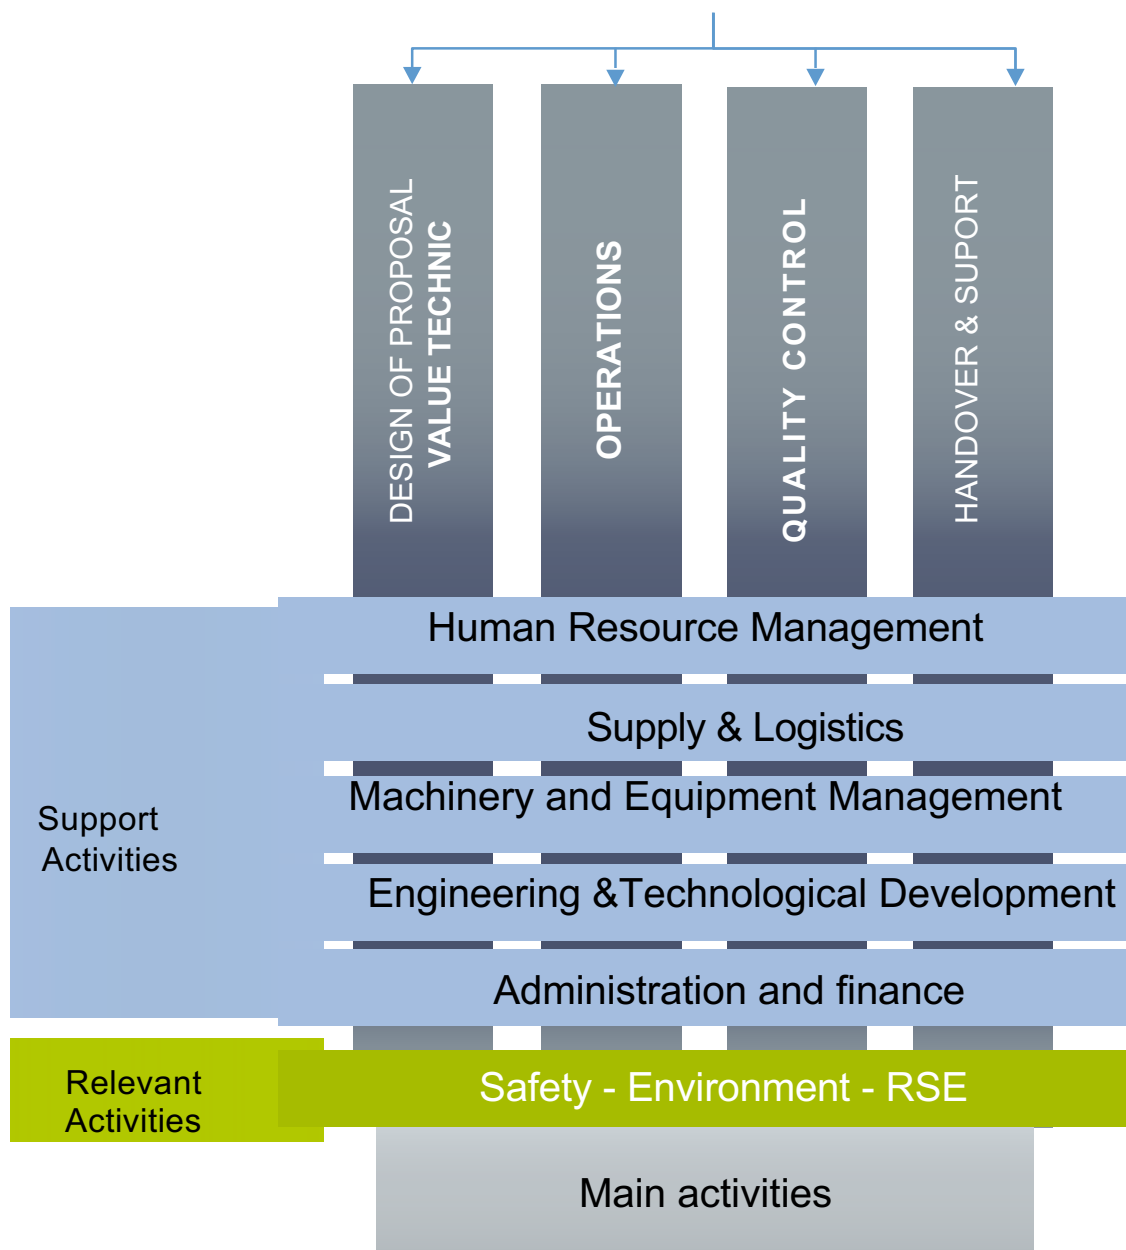

THE BOARD OF DIRECTORS

# Organizational Structure

Board of Directors

# Mining Services

## UNDERGROUND MINING

- Underground work.
- Mining exploration, preparation and development.
- Hydraulic backfill.
- Mine Closure.
- Support with rock bolts, shotcrete, square Wood, metal frames, cement injection and cable bolting.
- Horizontal excavations and shafts.
- Support with rock bolts, shotcrete, square Wood, metal frames, cement injection and cable bolting.
- Mechanized, semi-mechanized and conventional.

## OPEN PIT MINING

- Mine infrastructure construction
- Drilling and blasting
- Earthmoving Works (Loading and transporting)
- Maintenance of ramps and roads.
- Design of operational and final slopes.

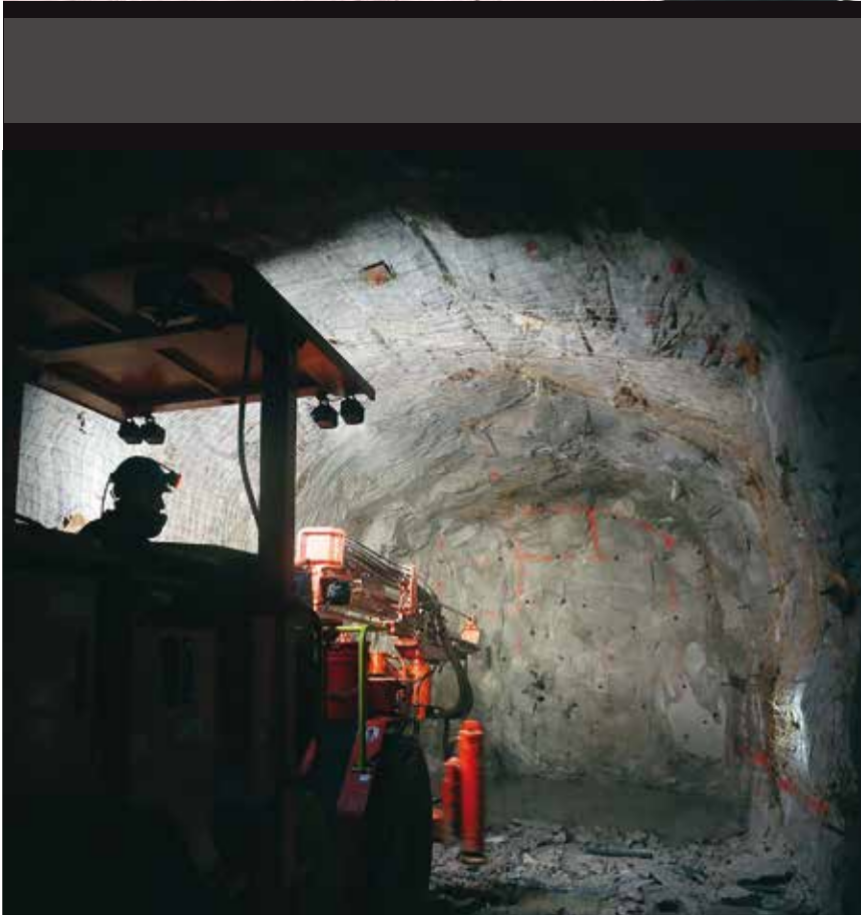

## Infrastructure Service (Civil Works)

- Construction of tunnels and infrastructure
- Construction of prefabricated camps.
- Construction of surface course roads: cobbled asphalted or paved.
- Construction of pluvial systems: riverbed covering, ditches, canals, secondary drainage system, sewage system, footbridges and bridges, ramps and private driveways.
- Construction of pedestrian walkways, platforms and Boulevards.
- Construction and rehabilitation of Rural roads.
- Construction of sanitary systems: Sewerage and wastewater treatment plants.
- Drinking water systems: Rural and urban aqueducts.

GLENCORE

## Our Clients – Construction projects

## Our Clients – foreign country mining projects

## Financial Support

# Financial Solvency

**Solvencia Financiera**

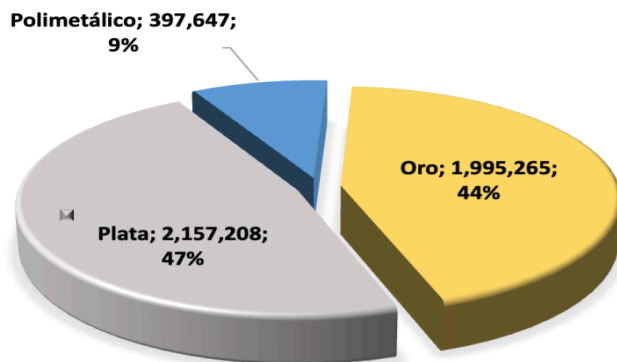

- The company implemented a cost reduction program since 2018, in order to increase the profit margins of the operations.
- Hand in hand with this strategy, the financial guideline is to reduce the debt coverage ratio (reducing debt), never being able to exceed 3 times the EBITDA.
- Looking ahead to 2022, profit margins are expected to be maintained, compared to 2019 (including POST COVID scenario)

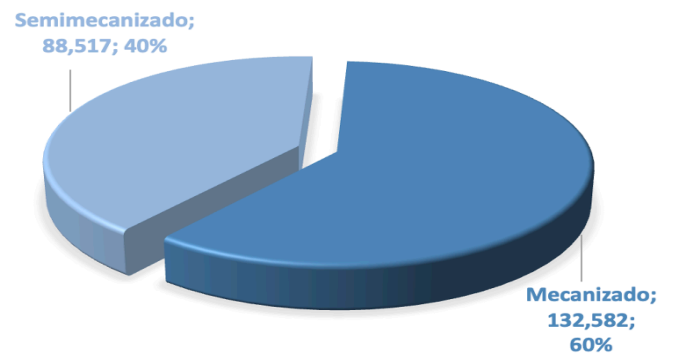

# Experience

## MINERALES EXPLOTADOS (Toneladas)

4.6 Millines ore Produced

## DESARROLLO MINERO (Metros)

221 Kilometers Developed
